1) Personal Information

My name is ADITYA, and my family name is HINGRAJIYA. You can call me Aditya. I have lived in Jamnagar for a long time and completed all my schooling at St. Xavier School in Jamnagar. I earned my diploma in computer engineering from G.T.U. with first-class honors. Currently, I am pursuing my Bachelor's degree in computer engineering from G.T.U. through a distance learning program. Alongside my college studies, I completed this Diploma software testing course.

Actually, I am an optimistic person who views every situation from multiple perspectives. I have a strong passion for analyzing new technologies and exploring different scenarios to uncover different issues.

Instead of focusing on building software, I prefer to challenge existing systems by identifying potential issues that could impact the product's quality.
This proactive approach is what drives my enthusiasm for software testing and influenced my decision to pursue this field over software development.

Additionally, I easily get Along with others, whether they are team members or someone new that are really unknown for me.
This ability to engage with a diverse range of individuals supports my collaborative nature and enhances my effectiveness in team environments.
